

Request for Quote – Implementation Security Surveillance Solution (Cameras) Q&A 1 – Amended Question #1

QUESTIONS AND ANSWERS

- 1) What make and model of cameras does NCEL intend to use for interior camera installations, and what make and model does NCEL intend to use for exterior camera installations?

The NCEL plans to use the following estimated number of cameras:

- **15 – external cameras; type – Axis multi-sensor/multi-view cameras (example).**
- **5 – box style teller cameras; type Axis M11 (example).**
- **50 – 360-hemispheric internal cameras; type Axis M30 (example).**
- **5 – 360-hemispheric internal cameras that are audio capable; type Axis M30 (example).**

This said, the NCEL is open to camera recommendations, and it reserves the right to utilize alternative makes and/or models. Any recommendation different from what is listed would need to be Open NAND Flash Interface (ONFI) compliant and would need to be listed as an option and not part of the main proposal.

Please see below the updated Attachment A (Cost Submission) to the RFQ which must be used to submit the Cost Proposal.
